

HEALTHCARE MBA PROGRAM

— THE —
MALCOLM BALDRIGE SCHOOL OF BUSINESS

Current and aspiring healthcare professionals, who want to answer the call for leadership during this time of seismic change, recognize the need for new approaches to providing outstanding patient care.

Unlike many universities that offer a healthcare concentration within an existing MBA program, each course within Post University's Healthcare MBA includes challenging and relevant healthcare content to help you adapt and lead in today's changing healthcare landscape.

Post University's **Online Healthcare MBA** degree program was designed to help you:

- Anticipate and respond to the convergence of resources, technologies and priorities in a healthcare system marked by unprecedented change and opportunity
- Develop the practical healthcare-focused business knowledge and skills needed to manage change in the healthcare industry
- Better understand how healthcare policy and regulations will impact you and your organization
- Increase your own value by developing new value for your organization
- Assume a leadership position within a major healthcare system, private practice, non-profit community organization or small business dedicated to patient care

Developed with the input of healthcare payers, providers, practitioners and the general public, and taught by scholar-practitioners, Post's online Healthcare MBA program focuses on essential business practices catered to concerns and demands in the healthcare industry.

Offered by the nationally-ranked Malcolm Baldrige School of Business, this fully online accelerated format makes it possible for you to earn a market-driven and forward-thinking degree at a time and place that's convenient for you—without sacrificing quality.

FEATURED FACULTY

Dr. Carole Bergeron has built an entire career as a healthcare professional, first as a nurse and then as a program administrator, executive director and strategic and clinical consultant to healthcare organizations. When she helped build Post

*Carole Hersey Bergeron, Ph.D.
Academic Program Manager,
Healthcare MBA*

University's new online Healthcare MBA degree program, she wanted to make sure it would provide the breadth and depth of knowledge needed to adapt and lead in a rapidly changing healthcare system. That's why she consulted clinicians, insurance companies, patients and other constituents in the program's development. It's also why every course integrates healthcare concerns and challenges into the curriculum and is taught by faculty members with advanced degrees and many years of experience in their fields.

Dr. Bergeron holds a Ph.D. in Leadership and Change and a Master of Science in Human Services Administration (MHSA) from Antioch University, and a Diploma in Nursing from the Catherine Labouré School of Nursing. She has taught undergraduate courses in Ethics and Healthcare Management at Albertus Magnus College, graduate-level courses at Walden University and Southern Connecticut State, and provided training in Quality Patient Care and Safety, Organizational Change, Executive Leadership, Healthcare Financing and Clinical Implications, Rehabilitation, Long Term Care, Assisted Living, Healthcare Policy, and Effective Legislative Processes in corporate environments around the country.
